

Topic

**What are the main problems of
Cambodian education system?
What should we do to solve those
problems?**

Introduction

- Education under French colonization
- Most programs were adapted from French
- Education during Pol Pot regime went down to almost its zero point
- Train the young to sing, praise and obey the Organization
- After Pol Pot regime, education progressed slowly due to civil wars and genocide period.

Four main problems in Cambodian education system:

- Regional factor
- Personal or family factor
- School factor
- Government factor

Regional factor

- Schools are old and not enough
- Roads are very difficult to travel
- Students living far away from schools are not accessible with them
- The enrollment of students keeps decreasing due to their poor living condition and lack of transportation

Solution

- First, Fund are necessarily needed to achieve the plans for development.
- More schools and road need to be built and reconstructed.
- Government should provide poor students with shelter where it is close to schools.
- Doing so, the enrollment will be remarkably increased.

Personal or family factor

- Educational value is not given by the poor
- Lack of physical and emotional support for poor students
- More work and pressure make the poor lose interest in their education
- The inequality between man and woman in education still appears

Solution

- Promote educational value to the poor
- Parents should pay more attention on children education: providing emotional and physical support
- Equal chance on education should be provided to all women as stated in Woman Rights in 1993

School factor

- Lack of updated materials: course books, tape recorders, computers, and so on
- Teacher: low salary, corruption and a limit number of the teachers
- Poor school management and school policy

Solution

- Provide money to buy new materials
- Teacher's salary needs to be increased
- Program "Teacher's Centre" should be taken into account
- School management and school policy should be reinforced

Government factor

- Low government fund spent on education system
- Corruption on the educational fund raised from the other countries.

Solution

- Increase fund to develop education system
- Build up idea of honesty and self-righteousness

Continued

- The fund used for plans for educational development should be publically announced

Conclusion

- The problems arising with Cambodian education system have be solved
- We, Cambodian, love our nation by clearing way for our next generation

This is the end of presentation
